BILINGUAL EXECUTIVE ASSISTANT
2009 - 2011

Graduated

WORK EXPERIENCE

Front end Developer

GENOMAWORK
2020-2021

Front end developer, I was in charge to develop new features on the front of the platform like in their design and in their implementation. I perform in three main roles while the time I was in the company, UX research, UI design and Front end developer.

- Front end: Give functionality to components using React and Redux. At the beginning, the platform code was found with React with classes, so I had to refactor several views using the new version with Hooks and also to the new ones platform features.

- UI: Create and design the components using Sass, Css, Media queries for the responsive views and Flexbox. The main challenge in this area was to change the old Material UI framework for Ant Design.

- UX: UX research to create new functionalities and devise how to implement them, mockups with Figma and Photoshop.

Enterprising

RATSI BAGS
2016 - 2020

- I created a entrepreneurship about design, create and clothing sewing. I acquired a lot of skills like: self-learning, planning, organization, among others.
